Albert Herrera, Ph.D.  
Chairman, Search Committee  
Department of Biology  
Dornsife College of Letters, Arts and Sciences  
University of Southern California  
Los Angeles, CA 90089-0191  
Overseas Studies MC 0128

Ethel Percy Andrus  
Gerontology Center

John P. Walsh, Ph.D.  
Associate Professor of  
Gerontology and  
Neuroscience

Dear Dr. Herrera,

I am submitting my CV and this cover letter in consideration for the position (as application to the position) – (name the title/position # here).

I am very interested in bringing my “**EXPERTISE IN SCIENCE**” to work together in collaboration with the faculty of the Davis School – quick statement how.

Now review who you are in this expertise in science mentioned above. These have to be home runs of your scientific career (undergrad to postdoc). Publications in Science magazine or Nature or some equivalent.

Now you give a sentence on how you are very successful (or anticipate you will be) in funding your own research and through collaboration anticipate submitting applications with (name the faculty) for larger programmatic awards (program project grants, PO awards).

You love teaching at all levels and you are interested in applying the newest technologies to enhance the classroom experience.

I look forward to the opportunity to join one of the top programs in BLAH BLAH BLAH

Sincerely,

John P. Walsh, Ph.D.
